On the test day, the safety regulations for the driver as well as for the vehicle are checked.

Safety:

A rollover cage is required. This must extend over A + B pillar and consist of a metal pipe with at least 42mm diameter and a wall thickness of 2mm.

- Standard seat only in combination with standard belt - must be attached to the original fastenings!
- A racing shell seat and an H-Style racing seatbelt may only be installed together!
- If the vehicle still has headlights, these must be covered off!!
- If a windshield is installed, the windshield wipers must work!
- Noise level limitation at 98 +2db.
- A tarpaulin must be placed under each car that will be at least as big as the car itself!
- It is mandatory to wear a seatbelt and a helmet!

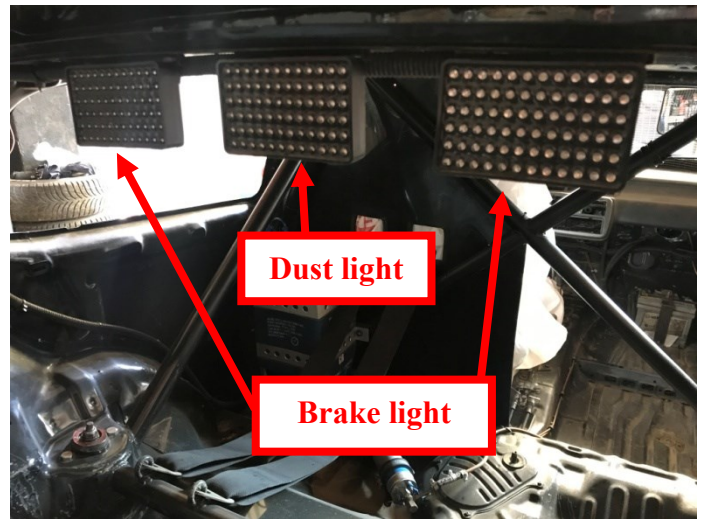

- **Brake light:** Each vehicle shall be equipped with two brake lights and a warning light measuring at least 56 cm². These must be at least 50 cm from the ground and equipped with a 21W light with a reflector.

Alternatively, clearly recognisable red LED lights are also allowed. These must be equipped with at least 60 diodes on an area of at least 50 cm² and have at least two rows.

The two outer lights shall act as break lights, the middle one as a warning light.

Brake lights shall be visible from the seating position of the vehicle driving behind (shall not be obscured by spoilers or rear wings) and shall be installed as far from the warning lamp as possible.

A flashing dust light is not allowed.

Protective clothing:

It is necessary to wear a neck guard, gloves and long clothes.
